

**Biodiesel Task Force  
Biodiesel Dispensing and Storage  
Site Permitting Summary**

**INTRODUCTION**

Biodiesel and vegetable based fuels move through a distribution infrastructure prior to deposition into vehicle tanks. The fuel is transferred to and from storage tanks in both the residential and commercial sectors. In addition, biodiesel will be stored and used in a more diverse manner than traditional petroleum based fuels due to accessibility issues and differing physical properties. Both supplier and consumer scenarios will be reviewed to identify the permitting scope.

**Scenario 1**

Business dispensing in a commercial area blended or neat

**Scenario 2**

Buyers club dispensing in a residential area blended or neat

**Scenario 3**

Personal use storage in a residential and/or commercial area blended or neat

**Scenario 4**

Commercial use storage in a residential and/or commercial area blended or neat

**Scenario 5**

Filling of residential and commercial storage tanks

**Scenario 6**

Mobile Dispensing of fuel for special events and fleet vehicles, blended or neat
