Green Internship Program Objectives:

- Build relationships between City and State Colleges, Green Business and Environmental Education Organizations to foster green career possibilities for communities currently underrepresented within the burgeoning Green Economy.
- Prepare City College Students to be successful applicants for Green Careers
- Create a venue for experts working in green careers to mentor and share their insight and advise looking for ways to link into the green economy
- Support green businesses in creation of on-site training opportunities for underrepresented communities by setting up internships and providing interns financial support and work related guidance

PROGRAM HIGHLIGHTS

- Green Career Conference, which outlines current trends within the Green Economy as well as mentoring from professionals within the Green Economy
- One day Environmental Advocacy and Professional Development course at City College to introduce interested students to key environmental issues using an Social Equity Pedagogical Approach
- Placement of 10 City College students in Green job internships for summer 2008
- Access for students to a Green Business Network
- Green Career Pathway Information
