

**PETITION: LANDMARK TREE DESIGNATION NOMINATION**  
**CALIFORNIA BUCKEYE**

We, the undersigned support the Landmark Designation nomination for the rare, old California Buckeye tree located at 730 28<sup>th</sup> Avenue. We understand that this tree most likely predates the home on this location, which was built in 1913 and was the first house on our block. This beautiful tree creates a stunning visual impact and symbolizes an essential connection with nature, vital in an urban setting such as San Francisco.

We understand it is one of the few natural California trees you will find in the City. In addition, this tree holds special significance to our community as it provides an important habitat for native mammals and bird species. It is also a beautiful tree that changes from season to season and provides a natural privacy screen to homes on 27<sup>th</sup> and 28<sup>th</sup> Avenues.
